- Member of the European Respiratory Society
- Member of the British Thoracic Oncology Group
- Fellow of the American College of Chest Physicians
- British Medical Association
- Fellow of the Royal Aeronautical Society
- Member of the Wilderness Medicine Society

Clinical Experience

Respiratory Medicine

I have had extensive training in respiratory medicine, including: asthma & allergy; lung cancer; TB and infection; pulmonary embolism (PE); interstitial lung disease (e.g. sarcoidosis and lung fibrosis); non-invasive ventilation; HIV & lung; cystic fibrosis; sleep medicine; occupational lung disease (occupational asthma, extrinsic allergic alveolitis and asbestos pleuro-pulmonary disease); pleural disease (e.g. pneumothorax, pleural effusion); and aviation medicine. I am proficient at fibre-optic bronchoscopy, bronchial washing, bronchoalveolar lavage, endobronchial biopsy, transbronchial biopsy and brush biopsy.

General (Internal) Medicine

I have a very wide experience of general medical problems and emergencies. I am confident in dealing with the usual general medical case-mix that presents to a typical district general hospital A+E department.

Professor Howard Branley MBChB MSc MD FCCP FRCP FRAeS
Consultant Physician in Respiratory & General Medicine
